Virtual: weekly sessions over 8 months.

* 4 hours per virtual session

OUTCOMES

- Understand the external environment and respond to trends and challenges through conscious thinking and influence.
- Develop the strategic know-how and deep business acumen required as a senior leader.
- Strategic insights will be grounded in deep self-awareness and self-regulation.
- Lead yourself with purpose and awareness.

CONTEXT FOR THE PROGRAMME

- Regenesys' teaching and learning philosophy is centred around developing the human being first before anything else. Our belief is that a person plays many roles in life. These include being a parent, employee, community member etc. By focussing on the individual holistically and equipping them first with 'intelligences' and insights, they can be better leaders, better people and human beings.
- In addition to facilitating intellectual development, Regenesys Corporate Education believes that learning programmes should also develop emotionally intelligent and purpose driven delegates. We believe that this training intervention will substantially improve the strategic capability and performance of the participating managers.
- Strategic business insights will be grounded in self-awareness and self-regulation. Senior leaders operate in fast-paced, complex, and competitive environments. Leader needs to be able to problem solve and make quick decisions, often with conflicting pieces of information. They need to lead their teams to get the best in effort and creativity. This programme will develop the strategic know-how and deep business acumen required as a senior leader.
